

Dr.pen® A11

Auto Microneedling Therapy Device
Your Skincare Specialist

Specializing in the manufacture of MTS microneedle therapy devices, Dr.pen has become an international well-known brand since 2014. Professional, efficient, safe and comfortable, Dr.pen won the 2017 'Most Popular Beauty Brand' for these advantages.

Advantages

Pause when it is placed and starts when off

Comes with an induction base. The pen immediately pauses work when placed on the base, while remaining the current speed level, and continues to work with the same speed when off the base.

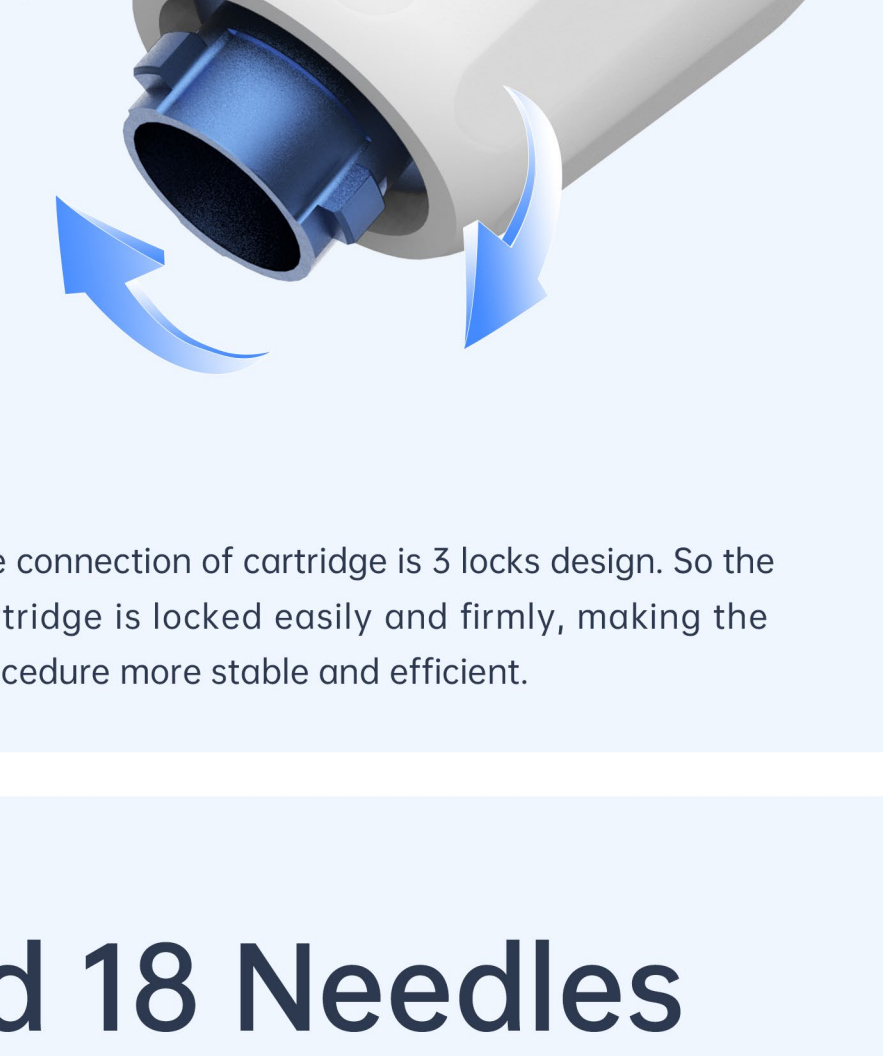

Pause Button & Wise Touch Screen

Press the Pause button and the handpiece will pause while maintaining the current speed level. This helps save power. The operator can also adjust the posture and operation during the pause, increasing the safety of the skin care process.

3L Connector

The connection of cartridge is 3 locks design. So the cartridge is locked easily and firmly, making the procedure more stable and efficient.

New Design Patented 18 Needles

- Ultra-sharp fine needle, diameter 0.18mm.
- Create more tiny channels.
- Better result with less pain, less trauma and faster recovery.

Skin Care

A11 has low battery warning to help users know the remaining battery power intuitively. It can better control the working hours.

Low battery warning

Induction Base Pause, Place and Display

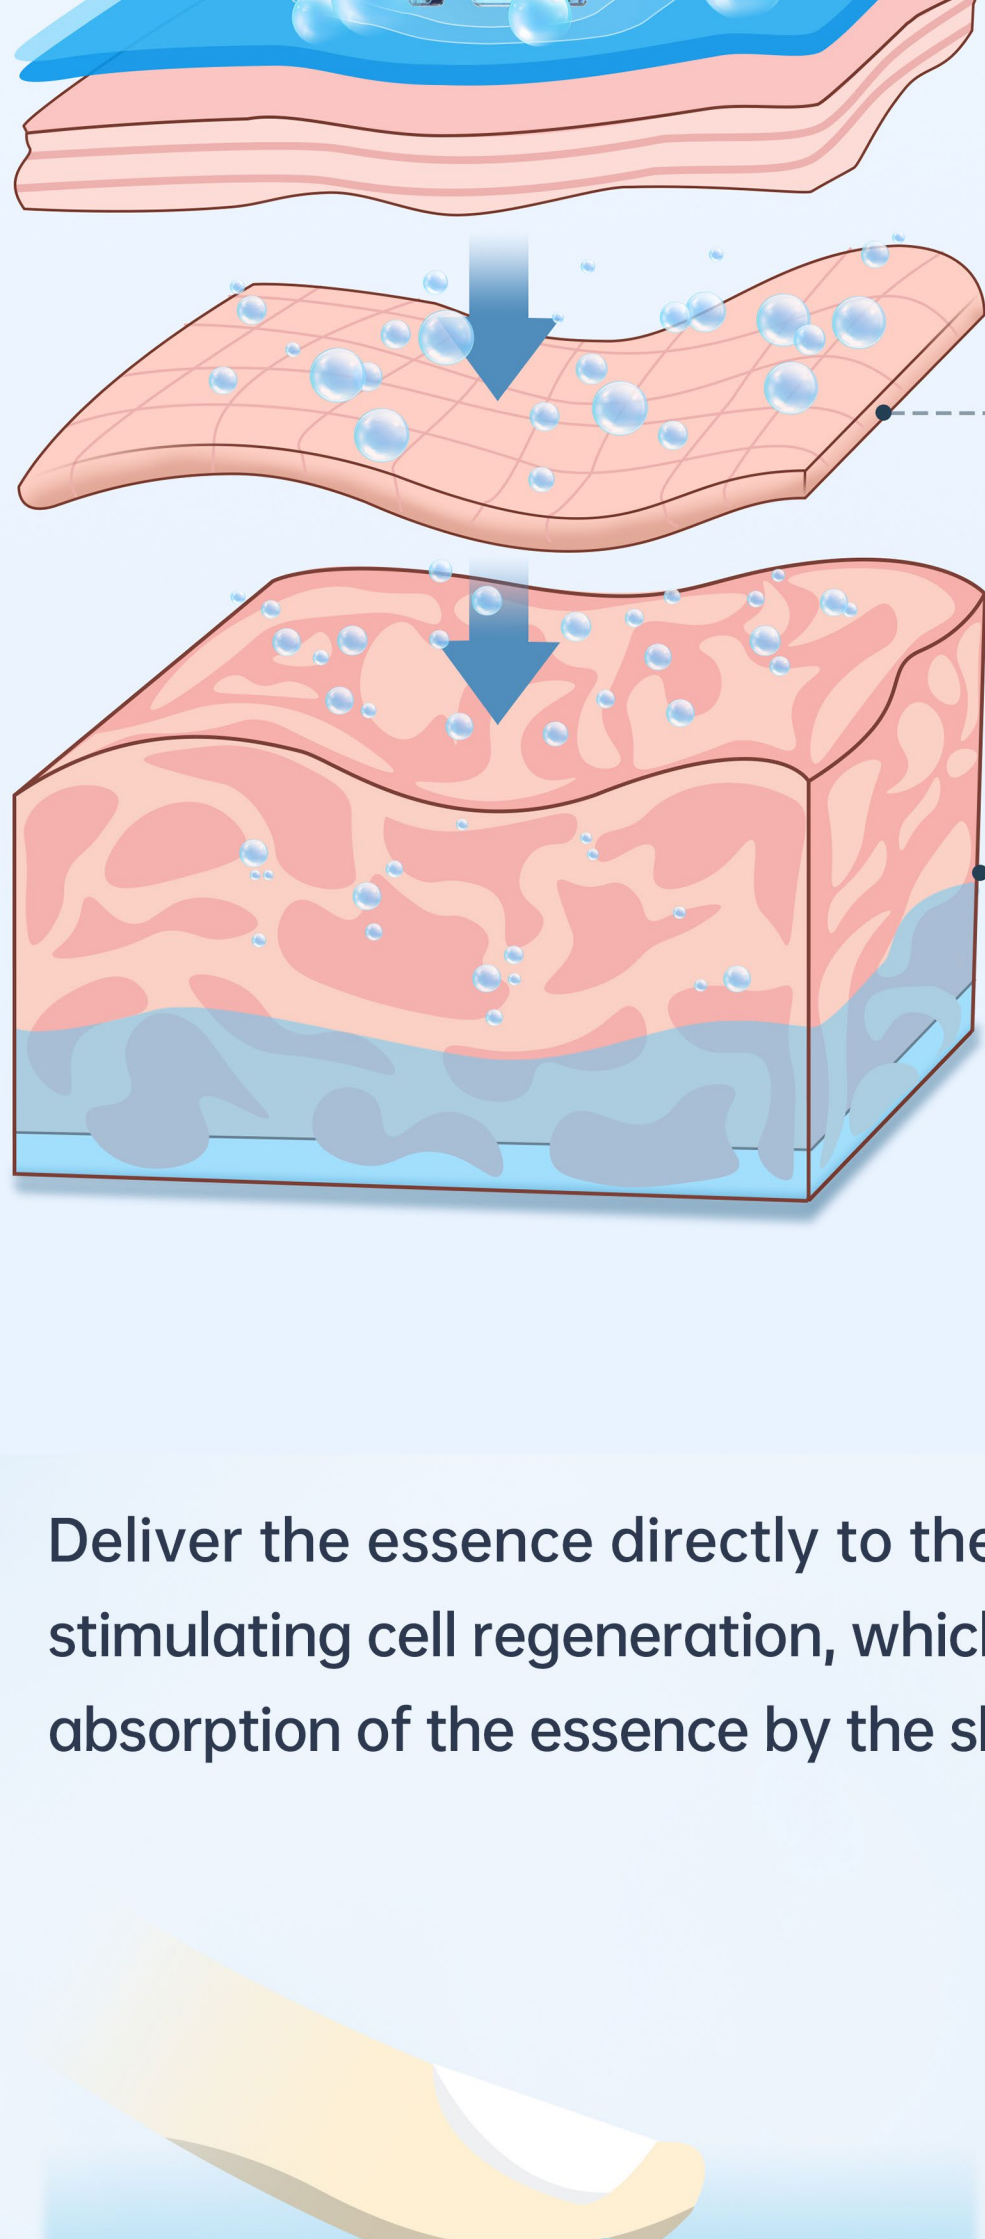

The number of speed flashes slowly when the battery capacity is 10% left.

The pen turns off automatically after the number of speed flashes quickly for 1 minute.

The pen shows "L" when restarting after the low battery automatic shutdown.

Break through the stratum corneum and deliver the essence

Quickly deliver the essence to the dermis, nourish and activate the dermis, and increase the absorption rate of the essence.

1.Create microchannels in skin

By penetrating the epidermis of the skin, it creates thousands of microchannels.

2.Deliver the essence

Evenly deliver the essence into the deep layer of the skin, the absorption rate can reach more than 85%.

3.Wake up the dermis

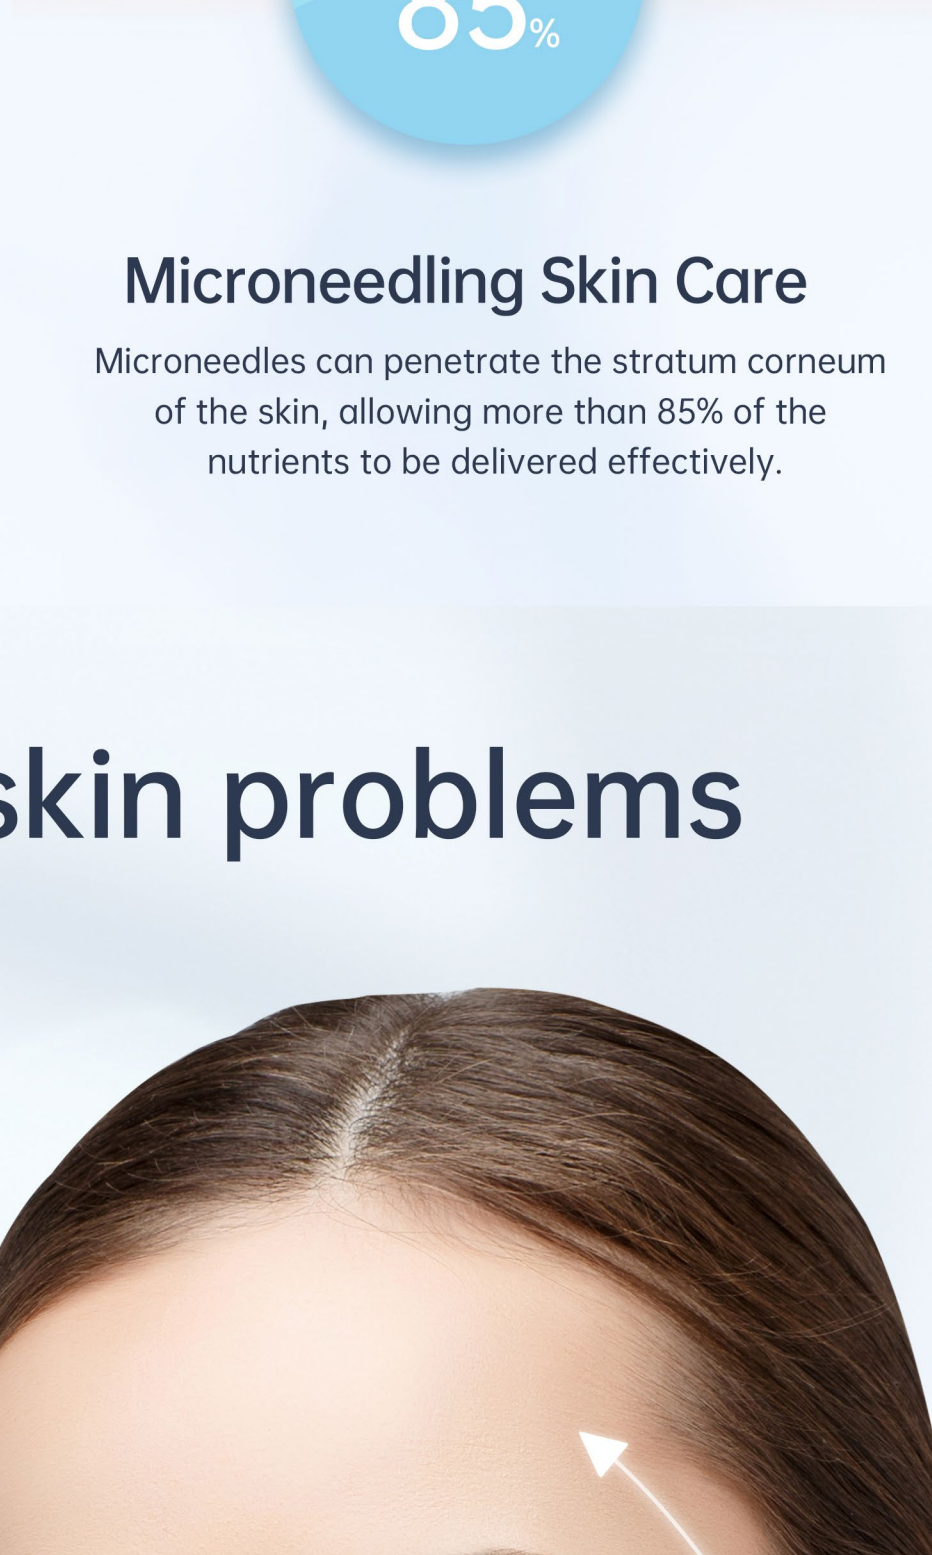

Quickly initiate skin tissue repair, stimulate cell regeneration, and improve skin texture.

Deliver the essence directly to the mesoderm of the skin, while stimulating cell regeneration, which is conducive to the complete absorption of the essence by the skin.

Daily skin care

The tough stratum corneum blocks the delivery of more than 95% of the essence, and the skin cannot absorb it effectively.

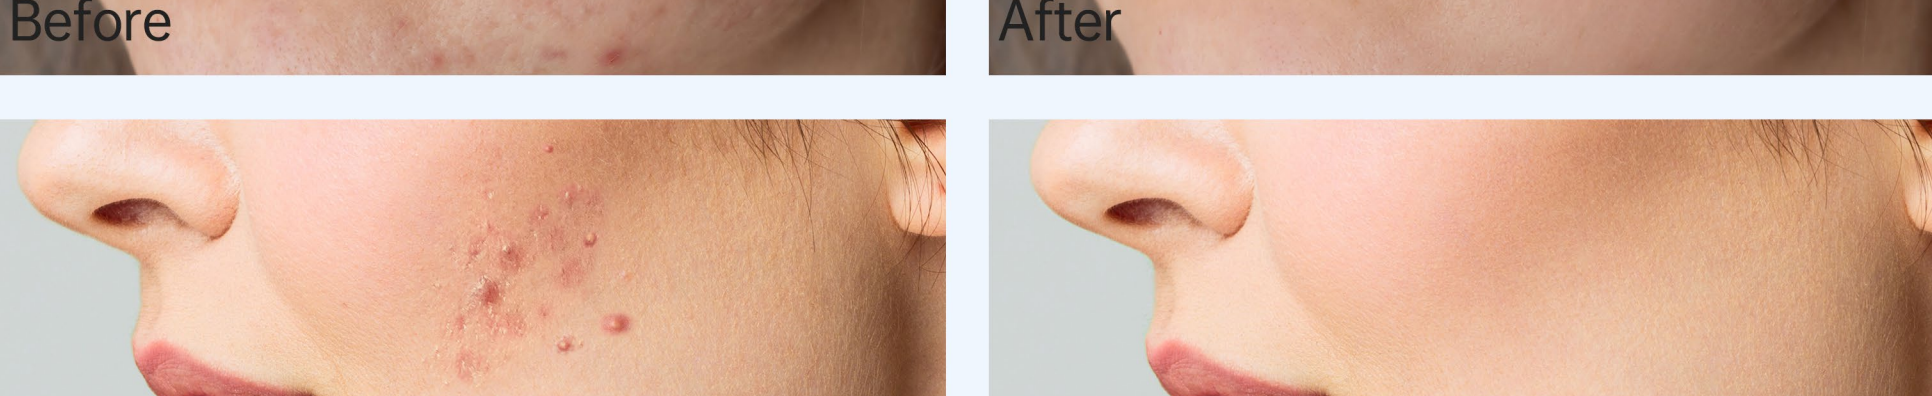

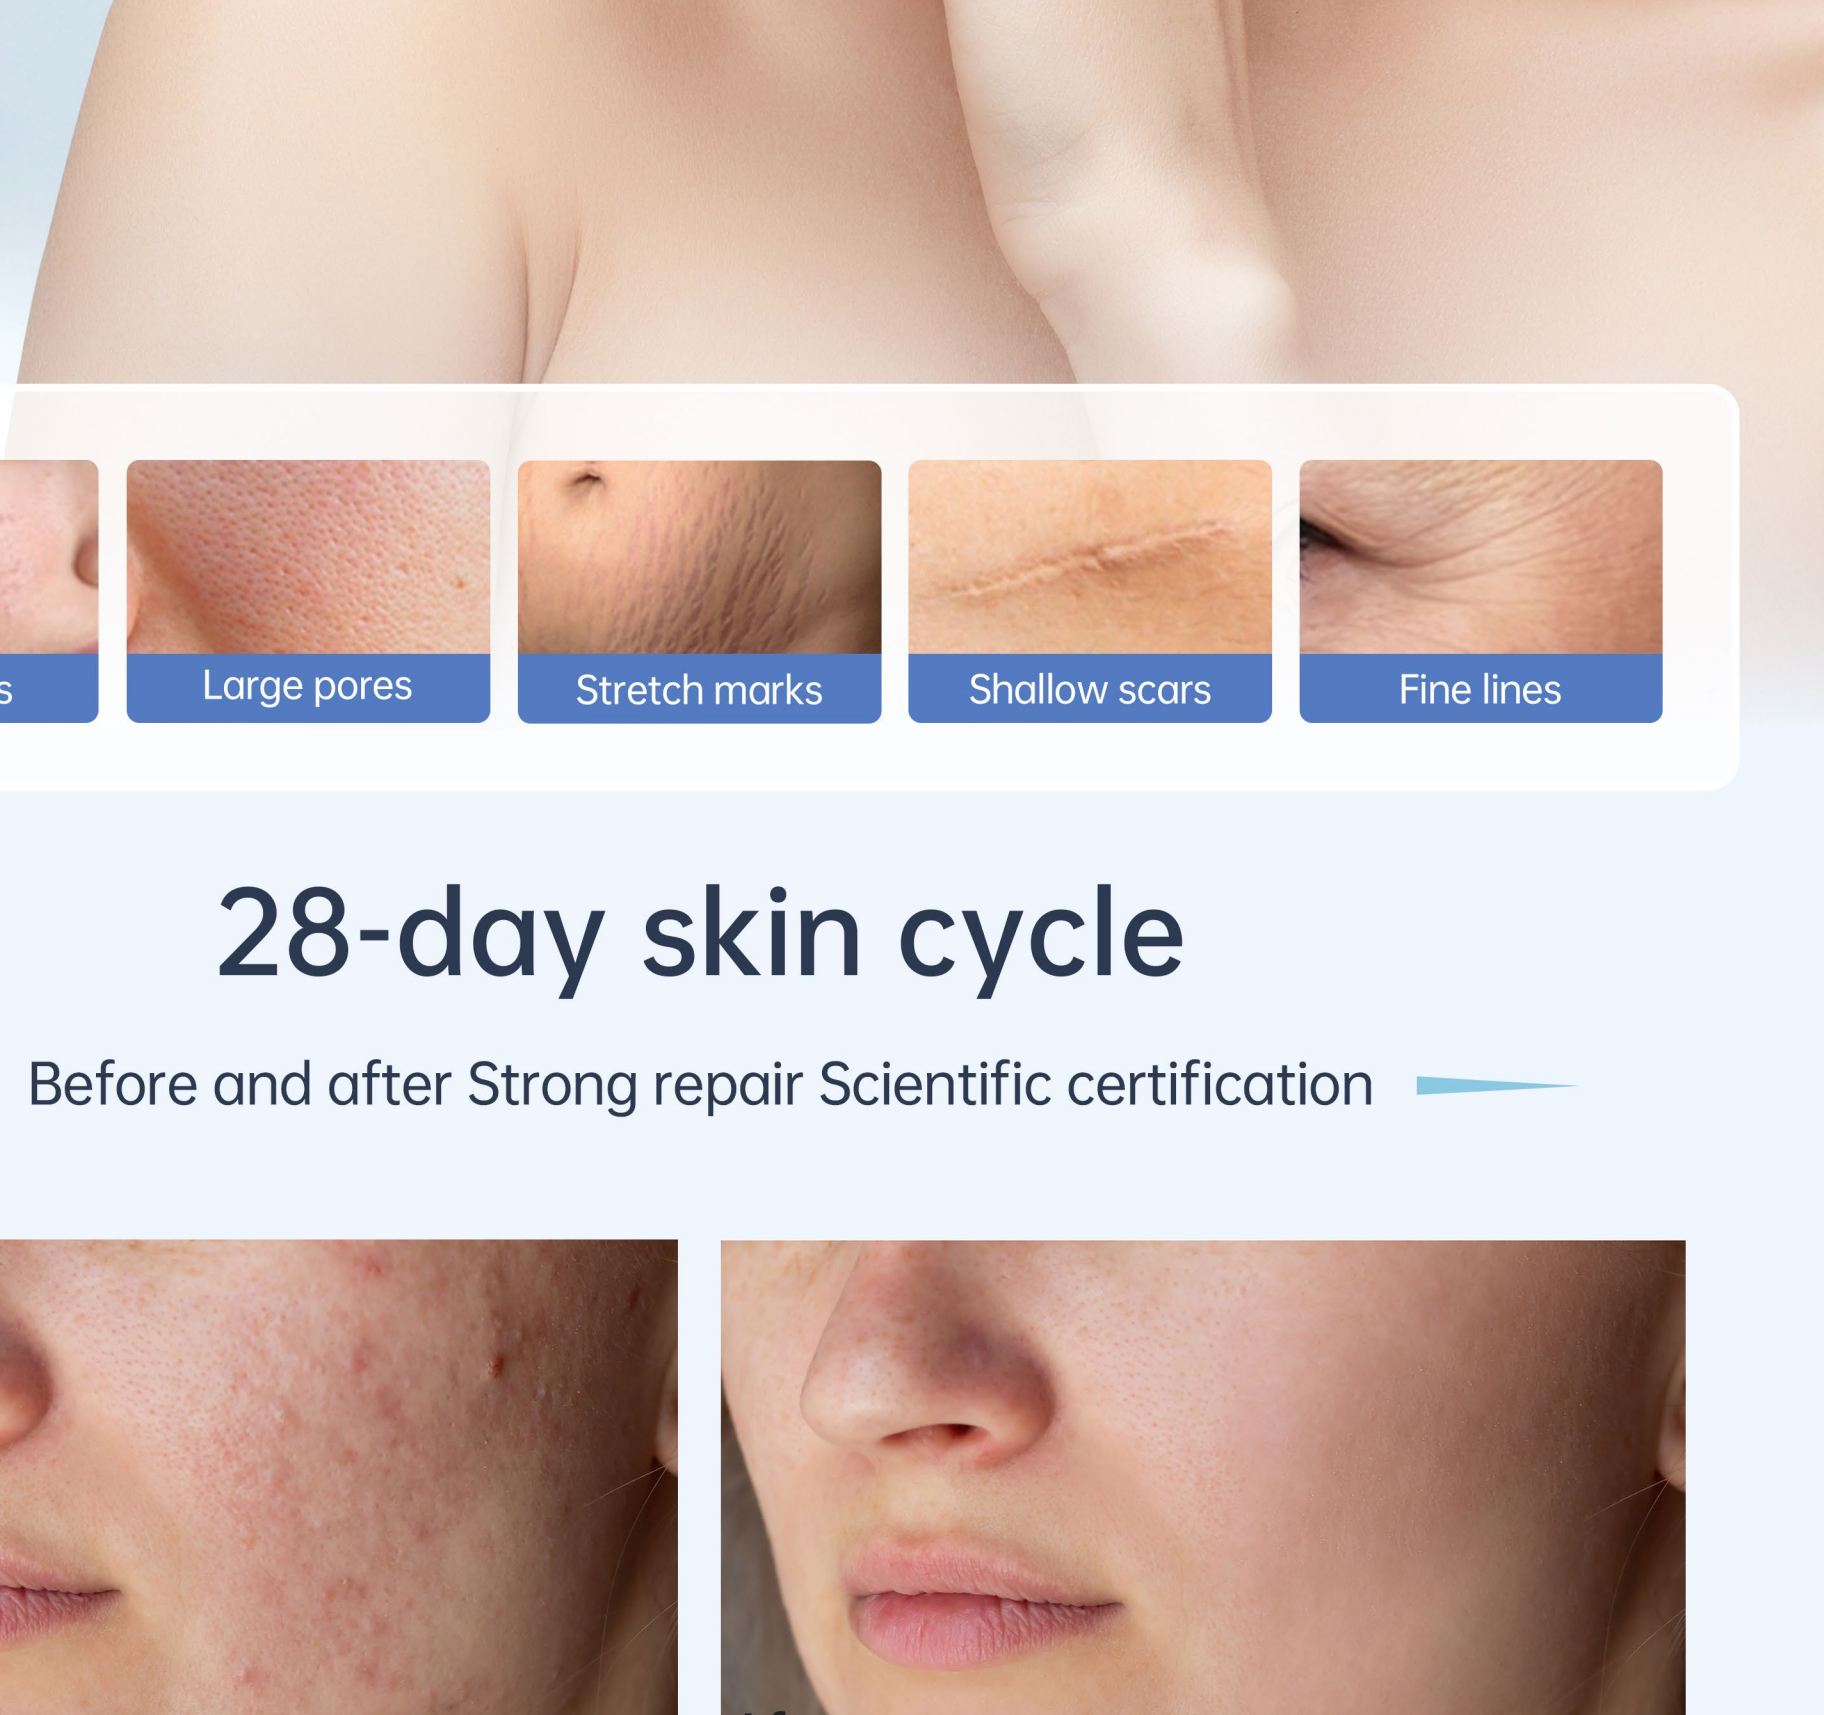

Microneedling Skin Care

Microneedles can penetrate the stratum corneum of the skin, allowing more than 85% of the nutrients to be delivered effectively.

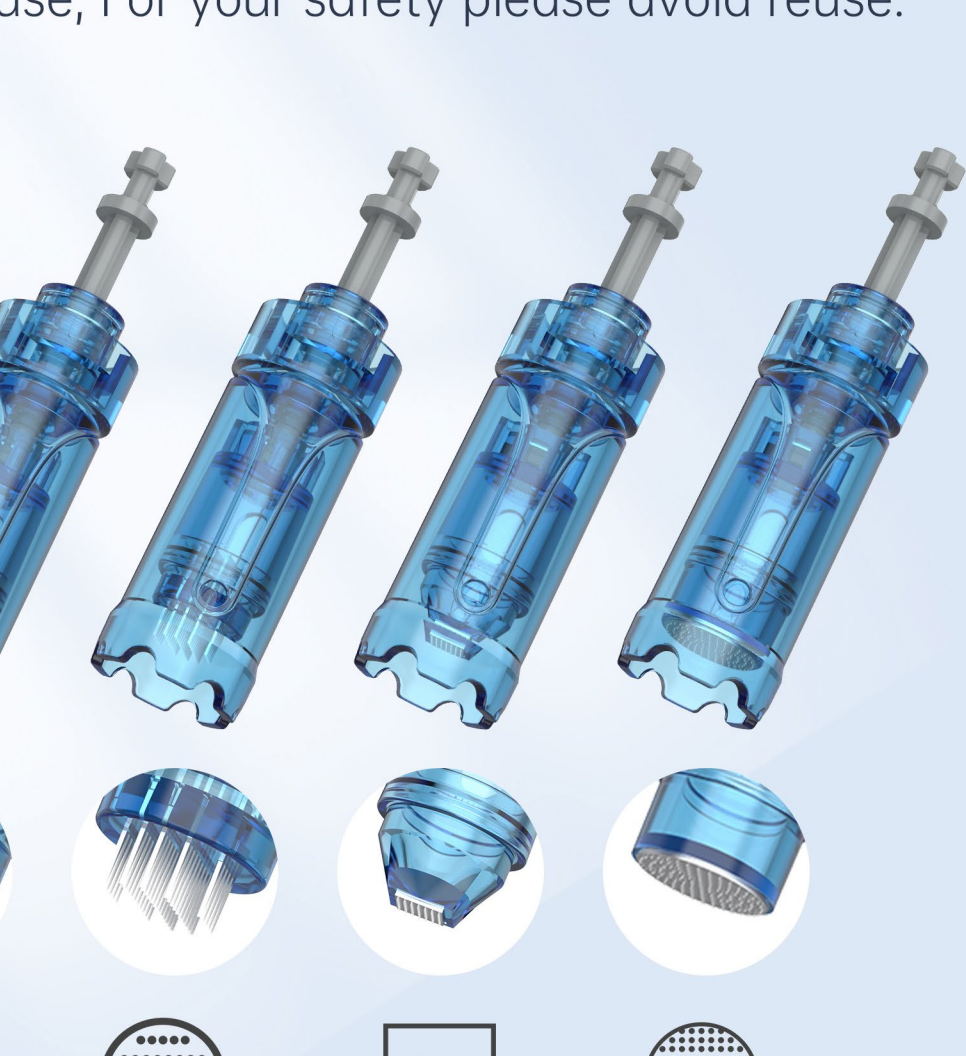

Solve various skin problems
